Product Template

Showcase your products and services, add interactive QR codes.

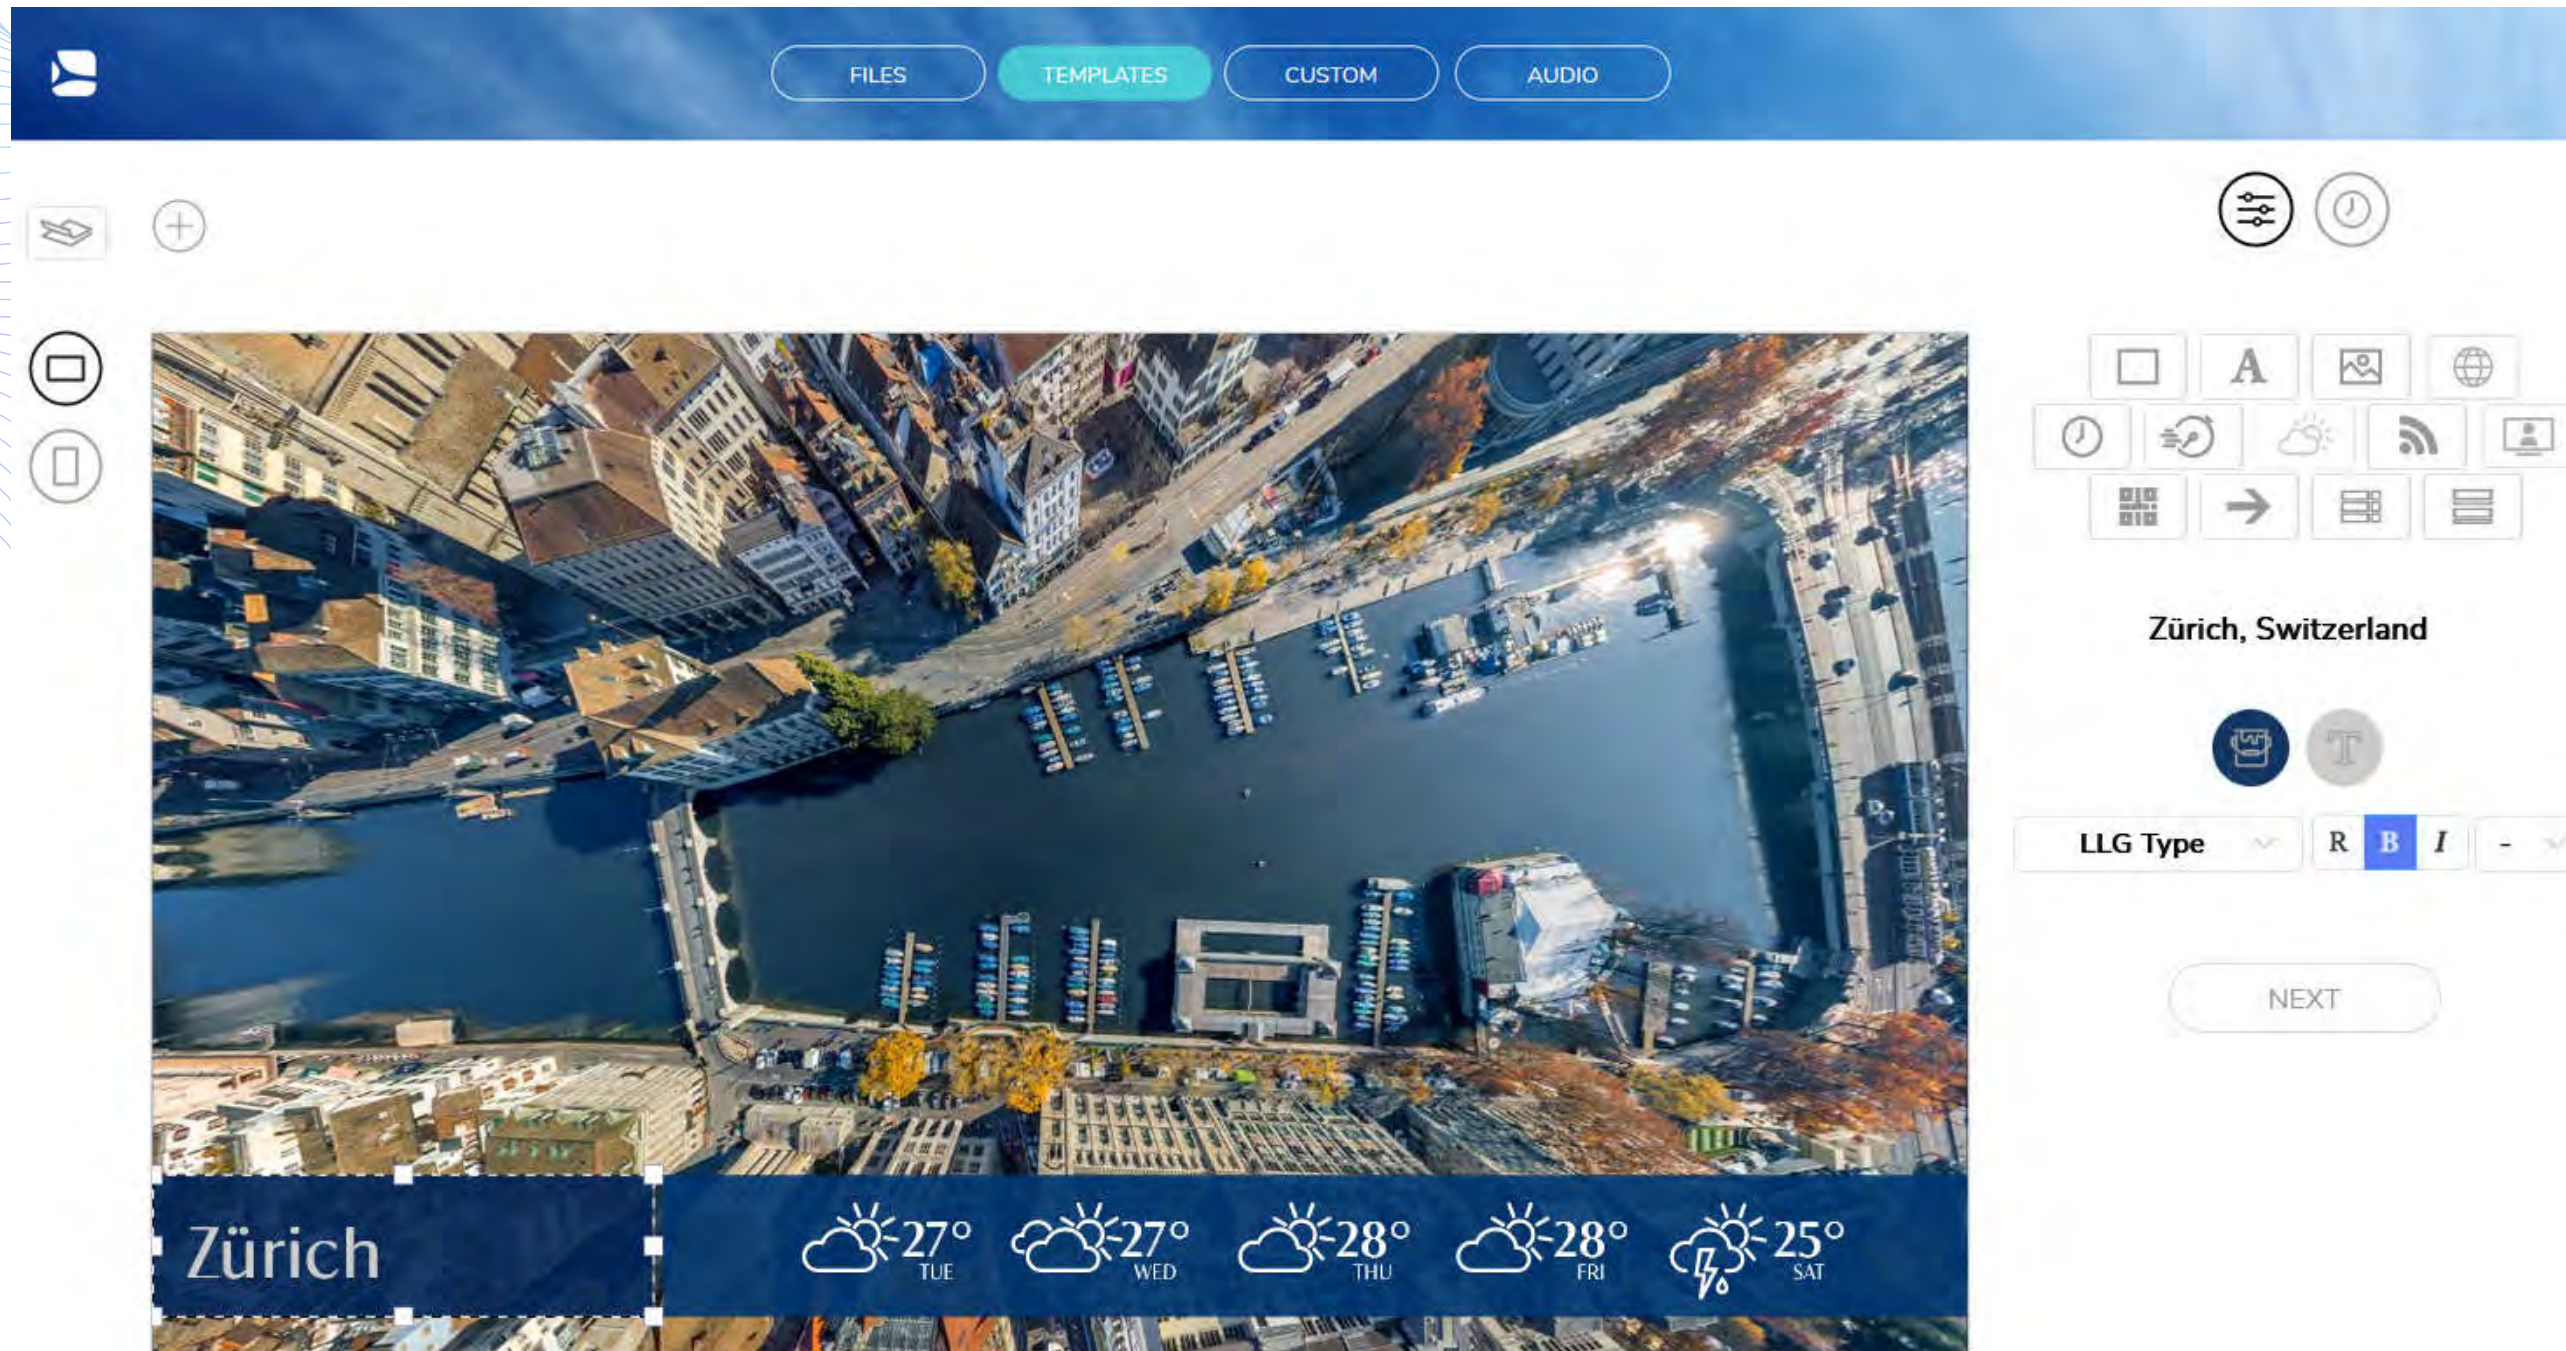

Equality

We strive for equality. We're committed to eliminating institutional, structural and individual inequalities. We support the new generation of individuals from diverse genders, communities, histories, and experiences – that tackles the systems that perpetuate inequalities on the basis of identity.

Info Template

Engage your audience with visually appealing informational displays with text and images.

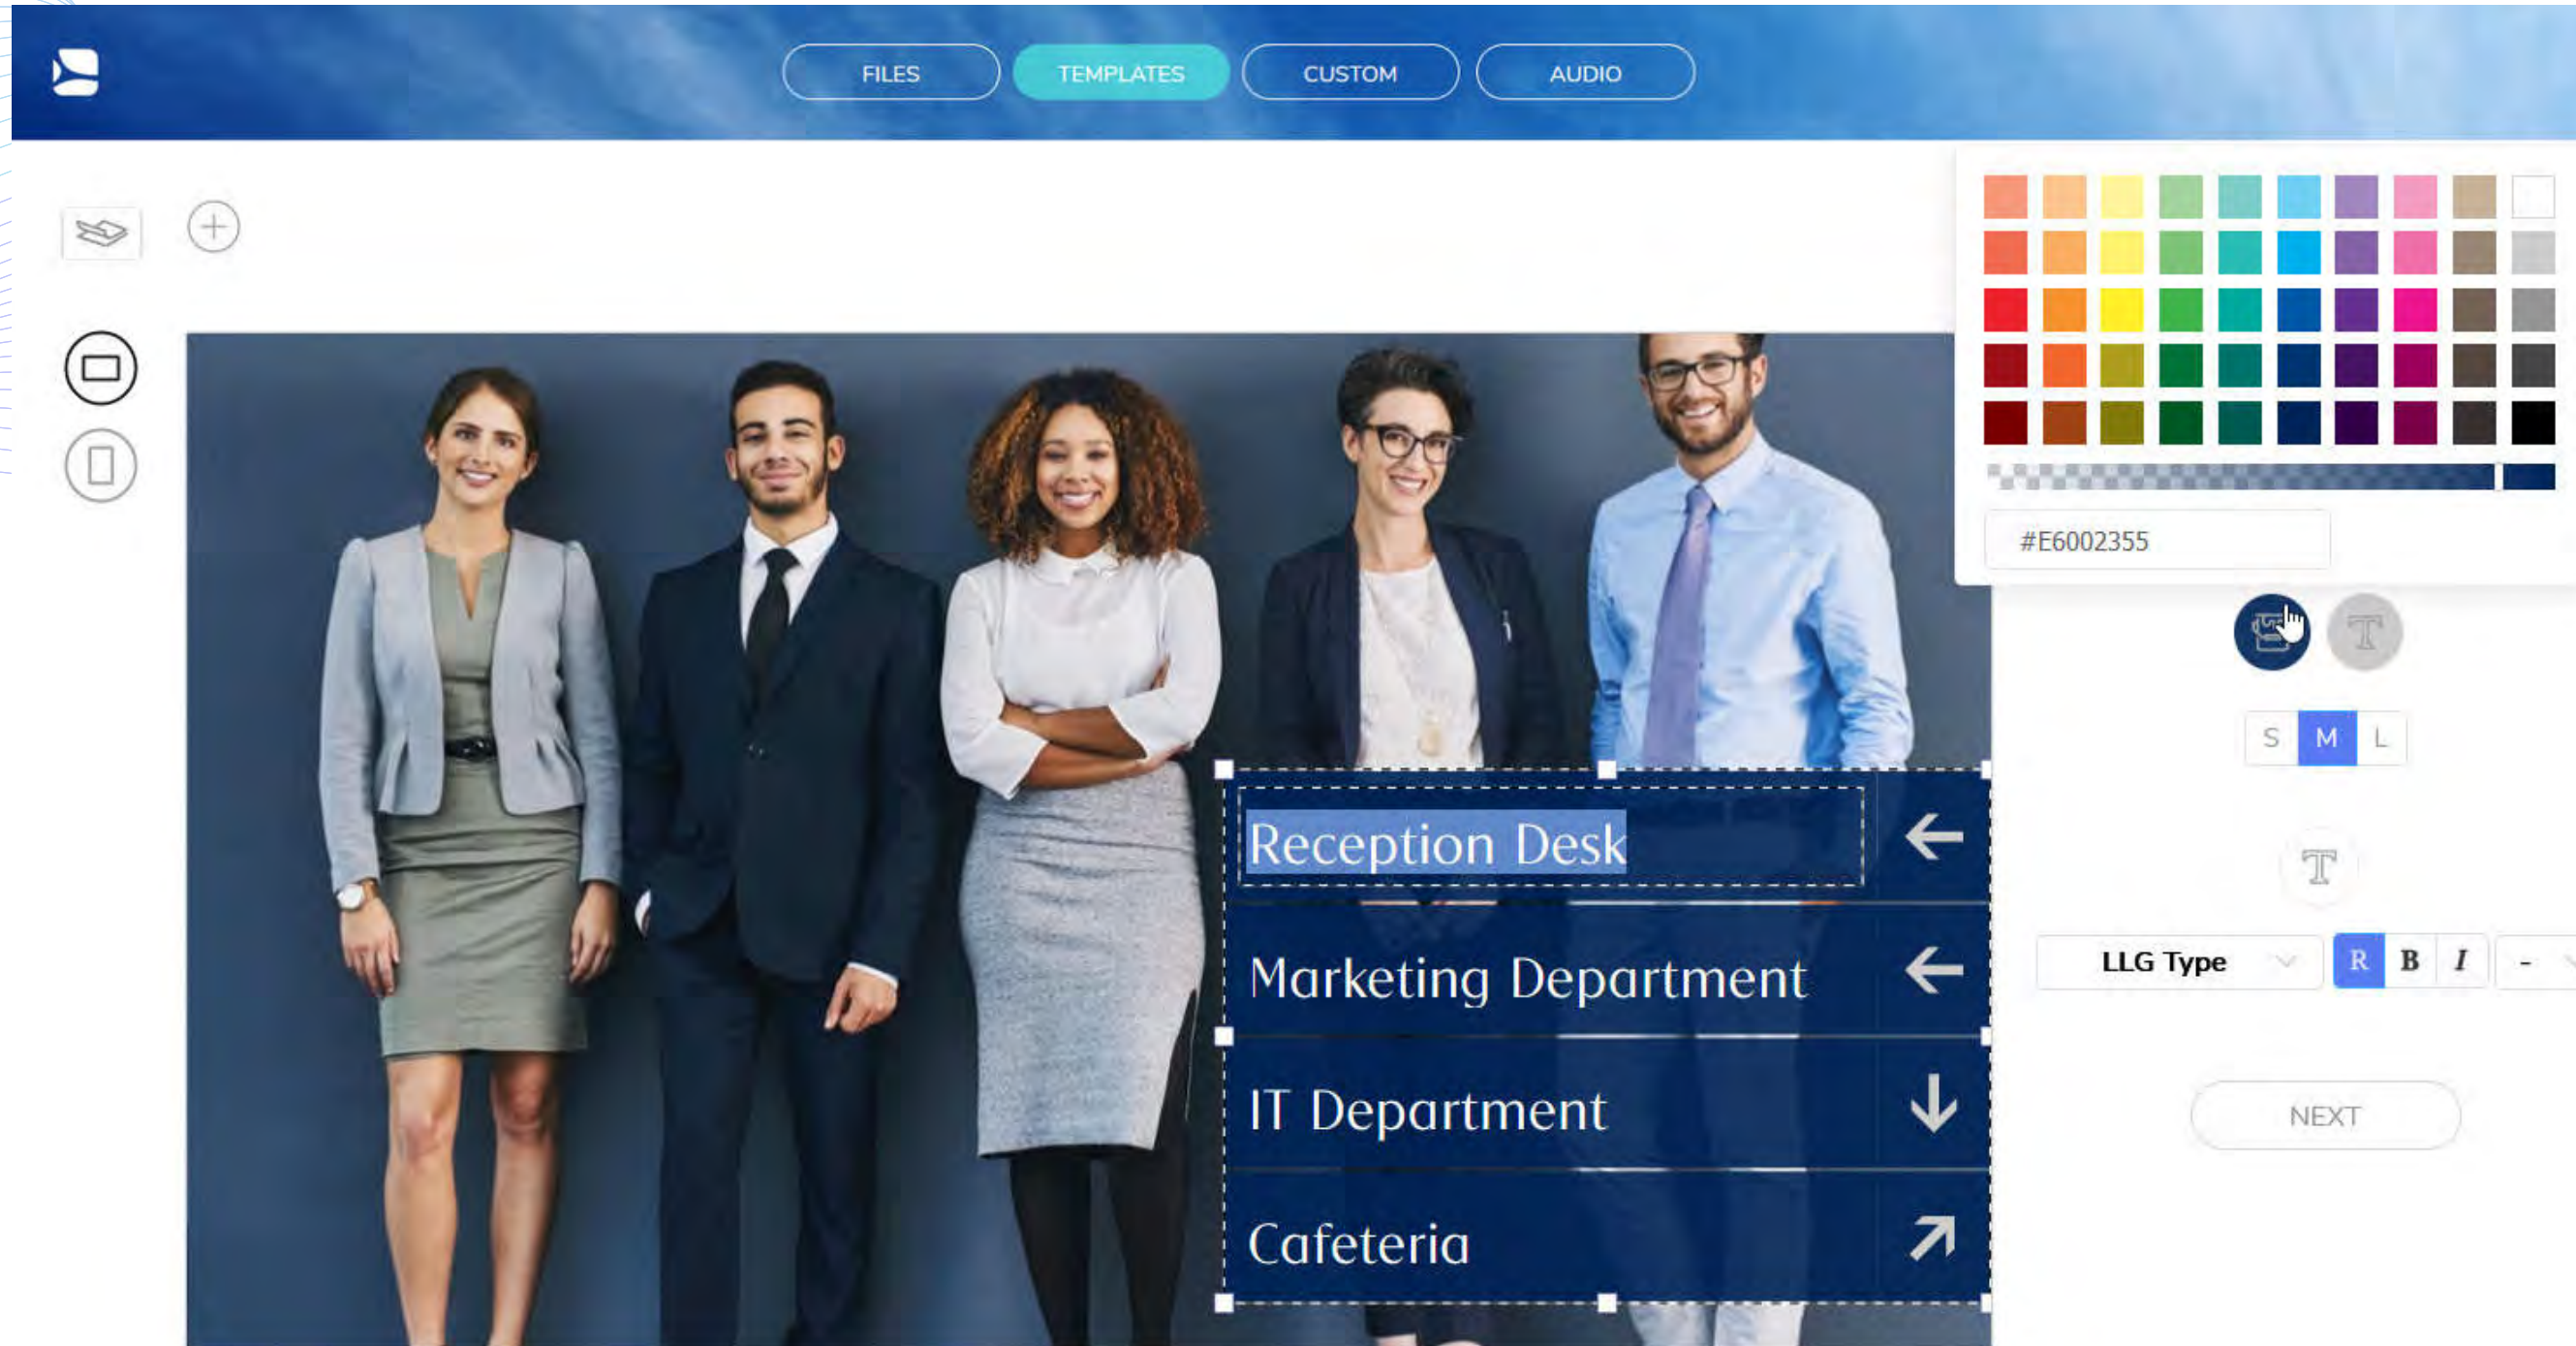

Weather Template

Show the weather forecast at one or multiple locations with fully responsive design.

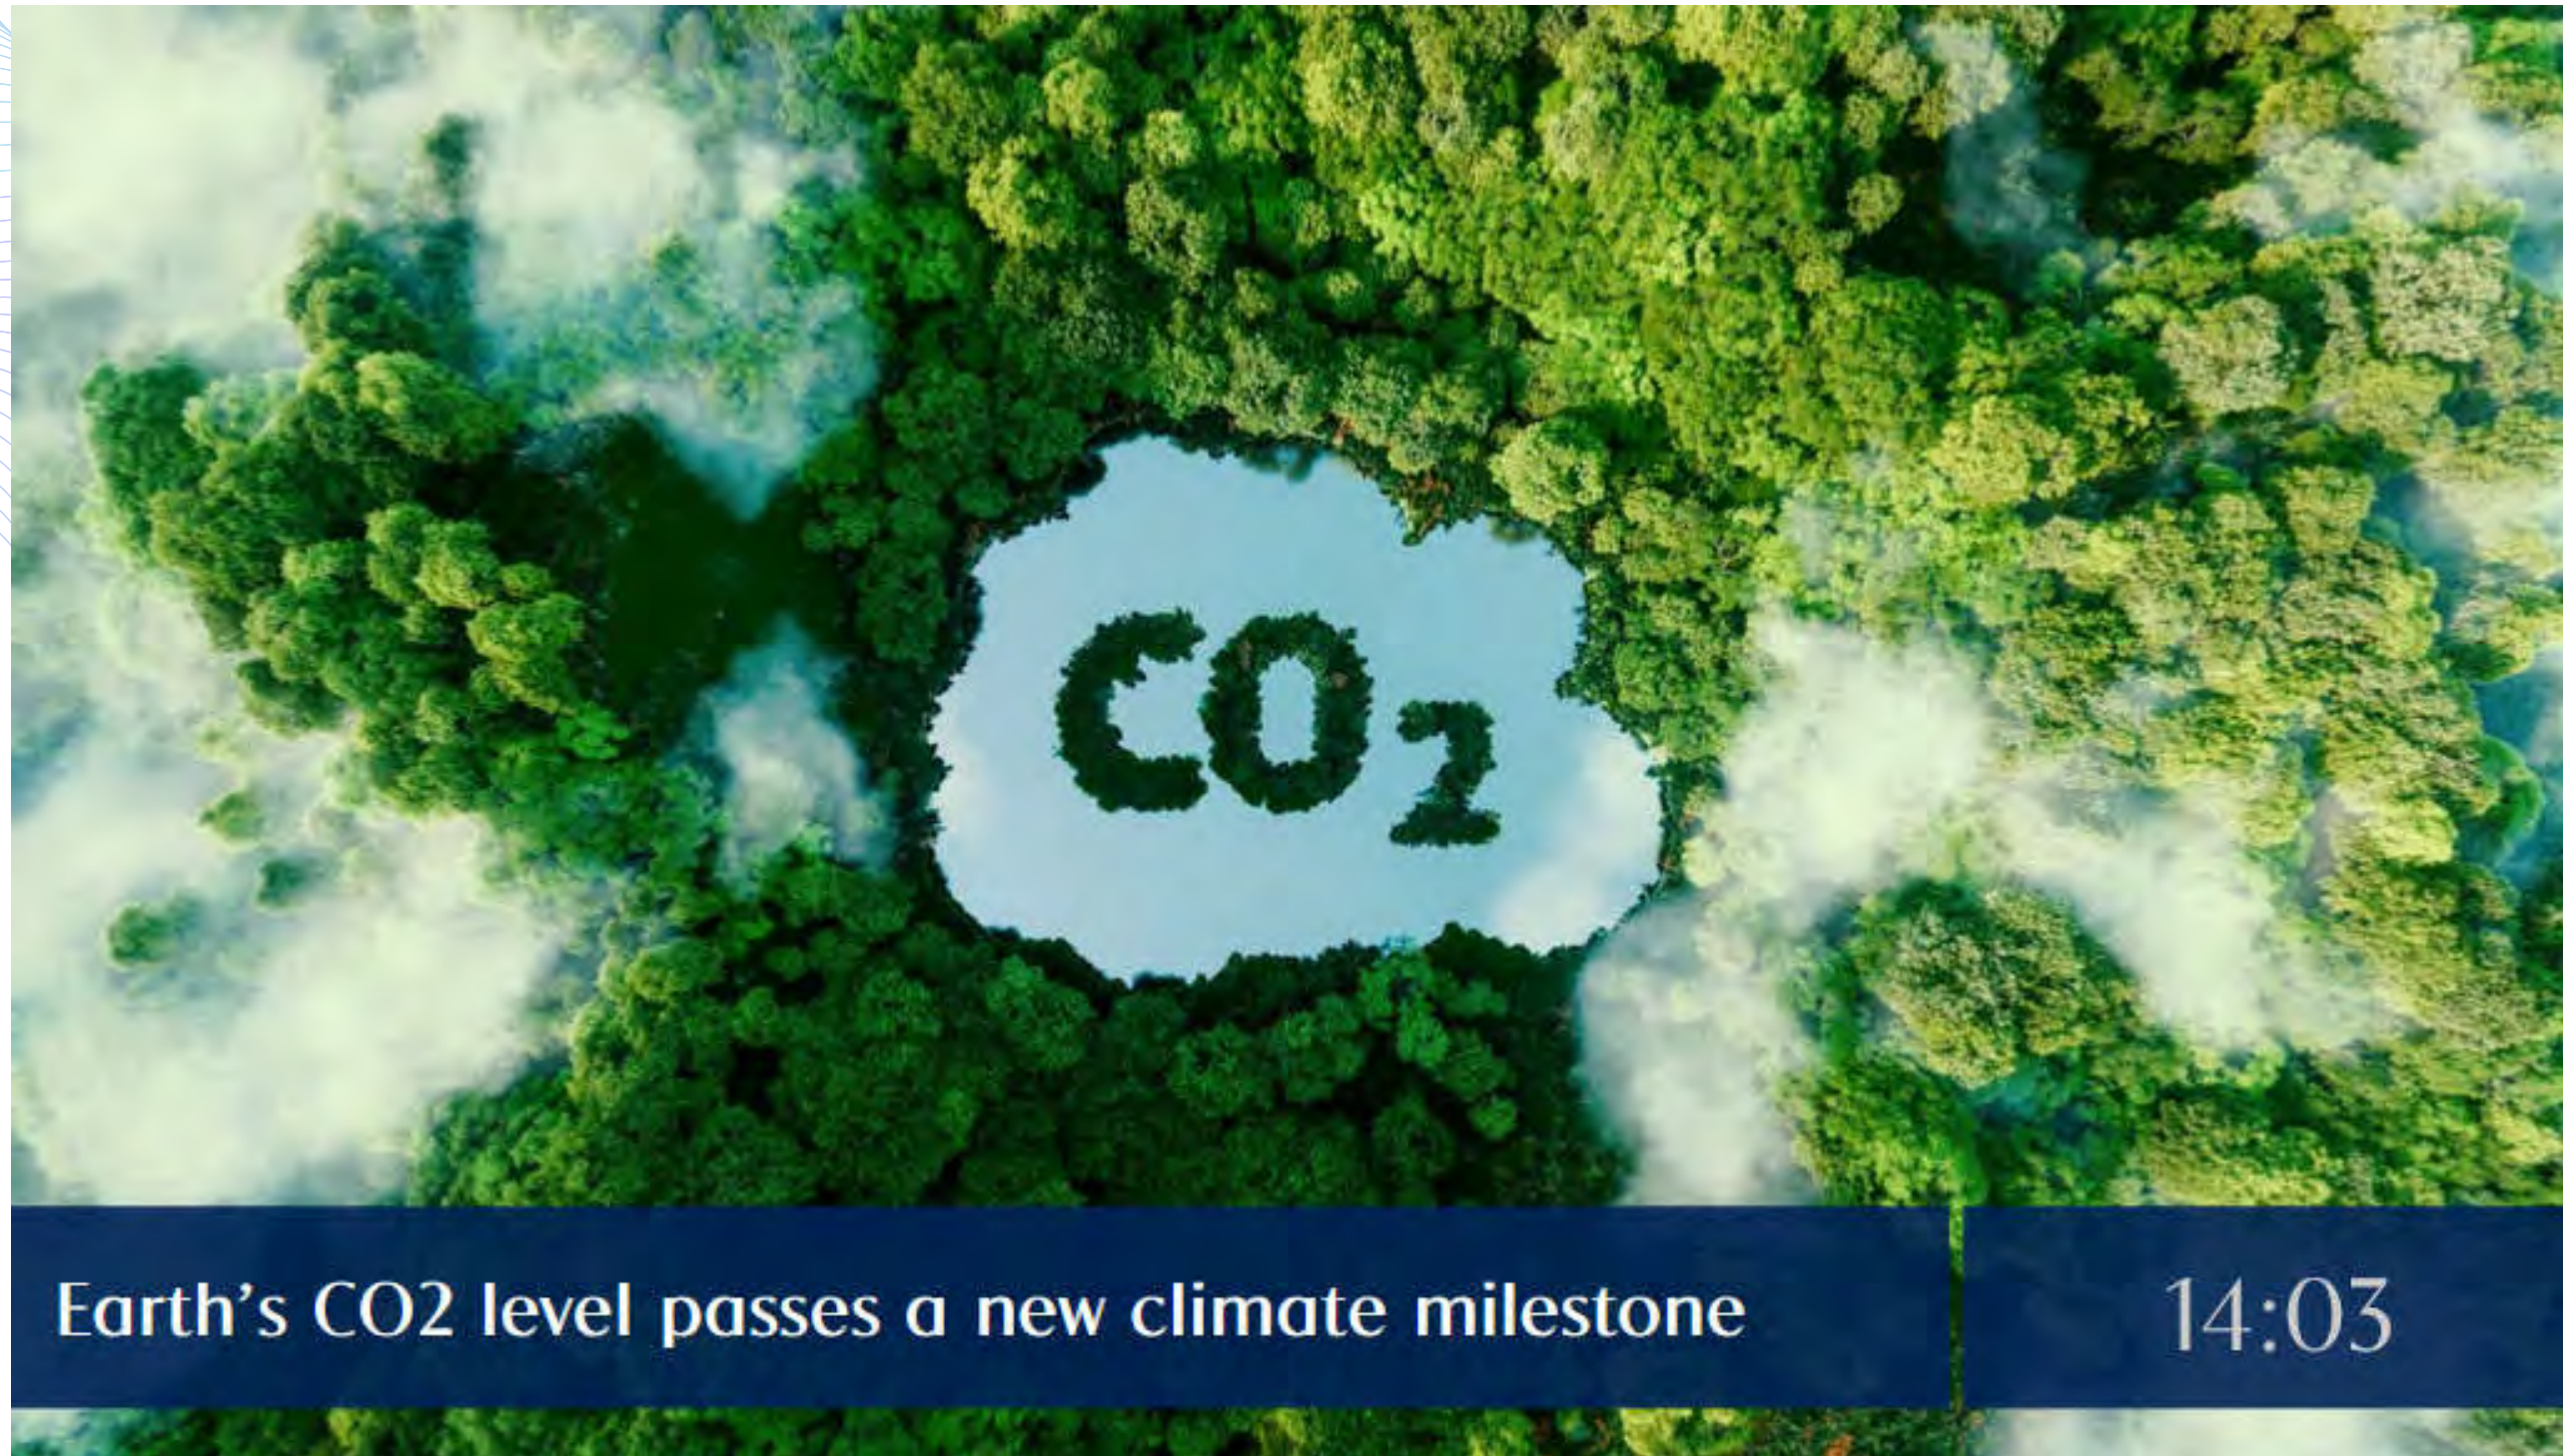

Person Template

Create memorable first impressions and make your guests feel welcome.

Wayfinding Template

Help your visitors, employees and guests orient themselves across your premises.

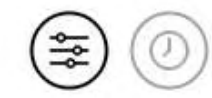

News Template

Focus on what moves your company - put your news on display.

Countdown Template

Showcase the days and hours left to the milestones that count most.

DURATION

Overlay Template

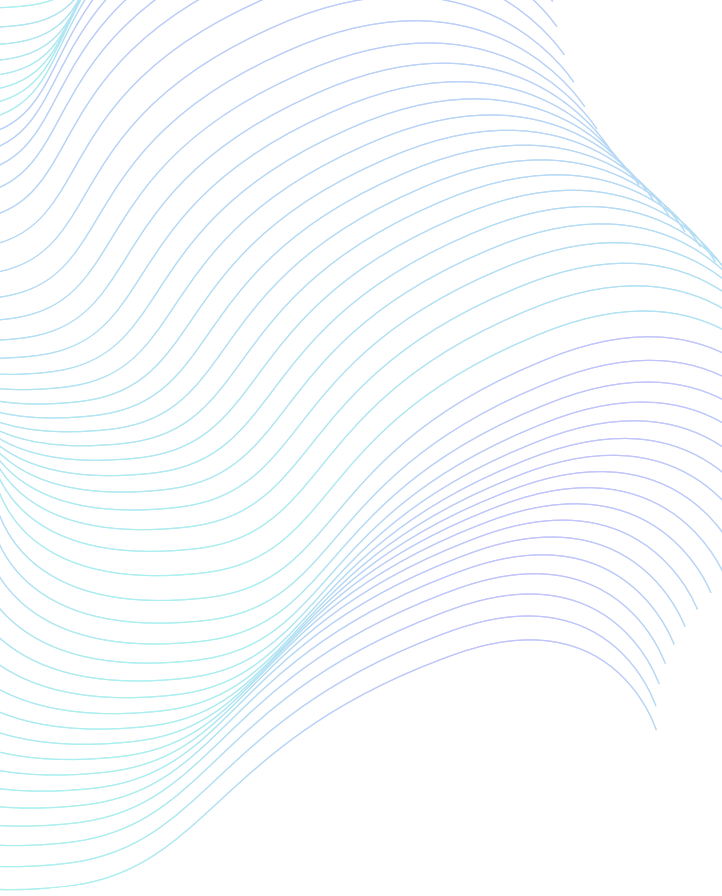

An easy way to add a layer (image, text, video and more) visible across all your existing content.

The interface features a top navigation bar with buttons for FILES, TEMPLATES, CUSTOM, and AUDIO. Below this is a search bar and a row of location tags: ALL, Zurich, Weather, San Francisco, Reception, Paris, New York, London, and HMP400W. A second row of tags includes HMP400, HMP350, Conference room, and Cafeteria. The main content area displays a grid of nine tiles: 'Let's do YOGA' (Product education), 'Weather Corporate II' (Weather), 'Welcome Max Grayson' (Person Corporate II), 'WELCOME Marie Z.' (Person PASTEL), 'Earth's CO2 level passes a new climate milestone' (News education), 'Today's Special CHF 9.-' (Menu Corporate II), 'Berries are packed with antioxidants...' (Product education), 'Headquarters 7.30 AM - 7PM Monday - Friday' (News education), and 'Product Sales' (Dashboard).

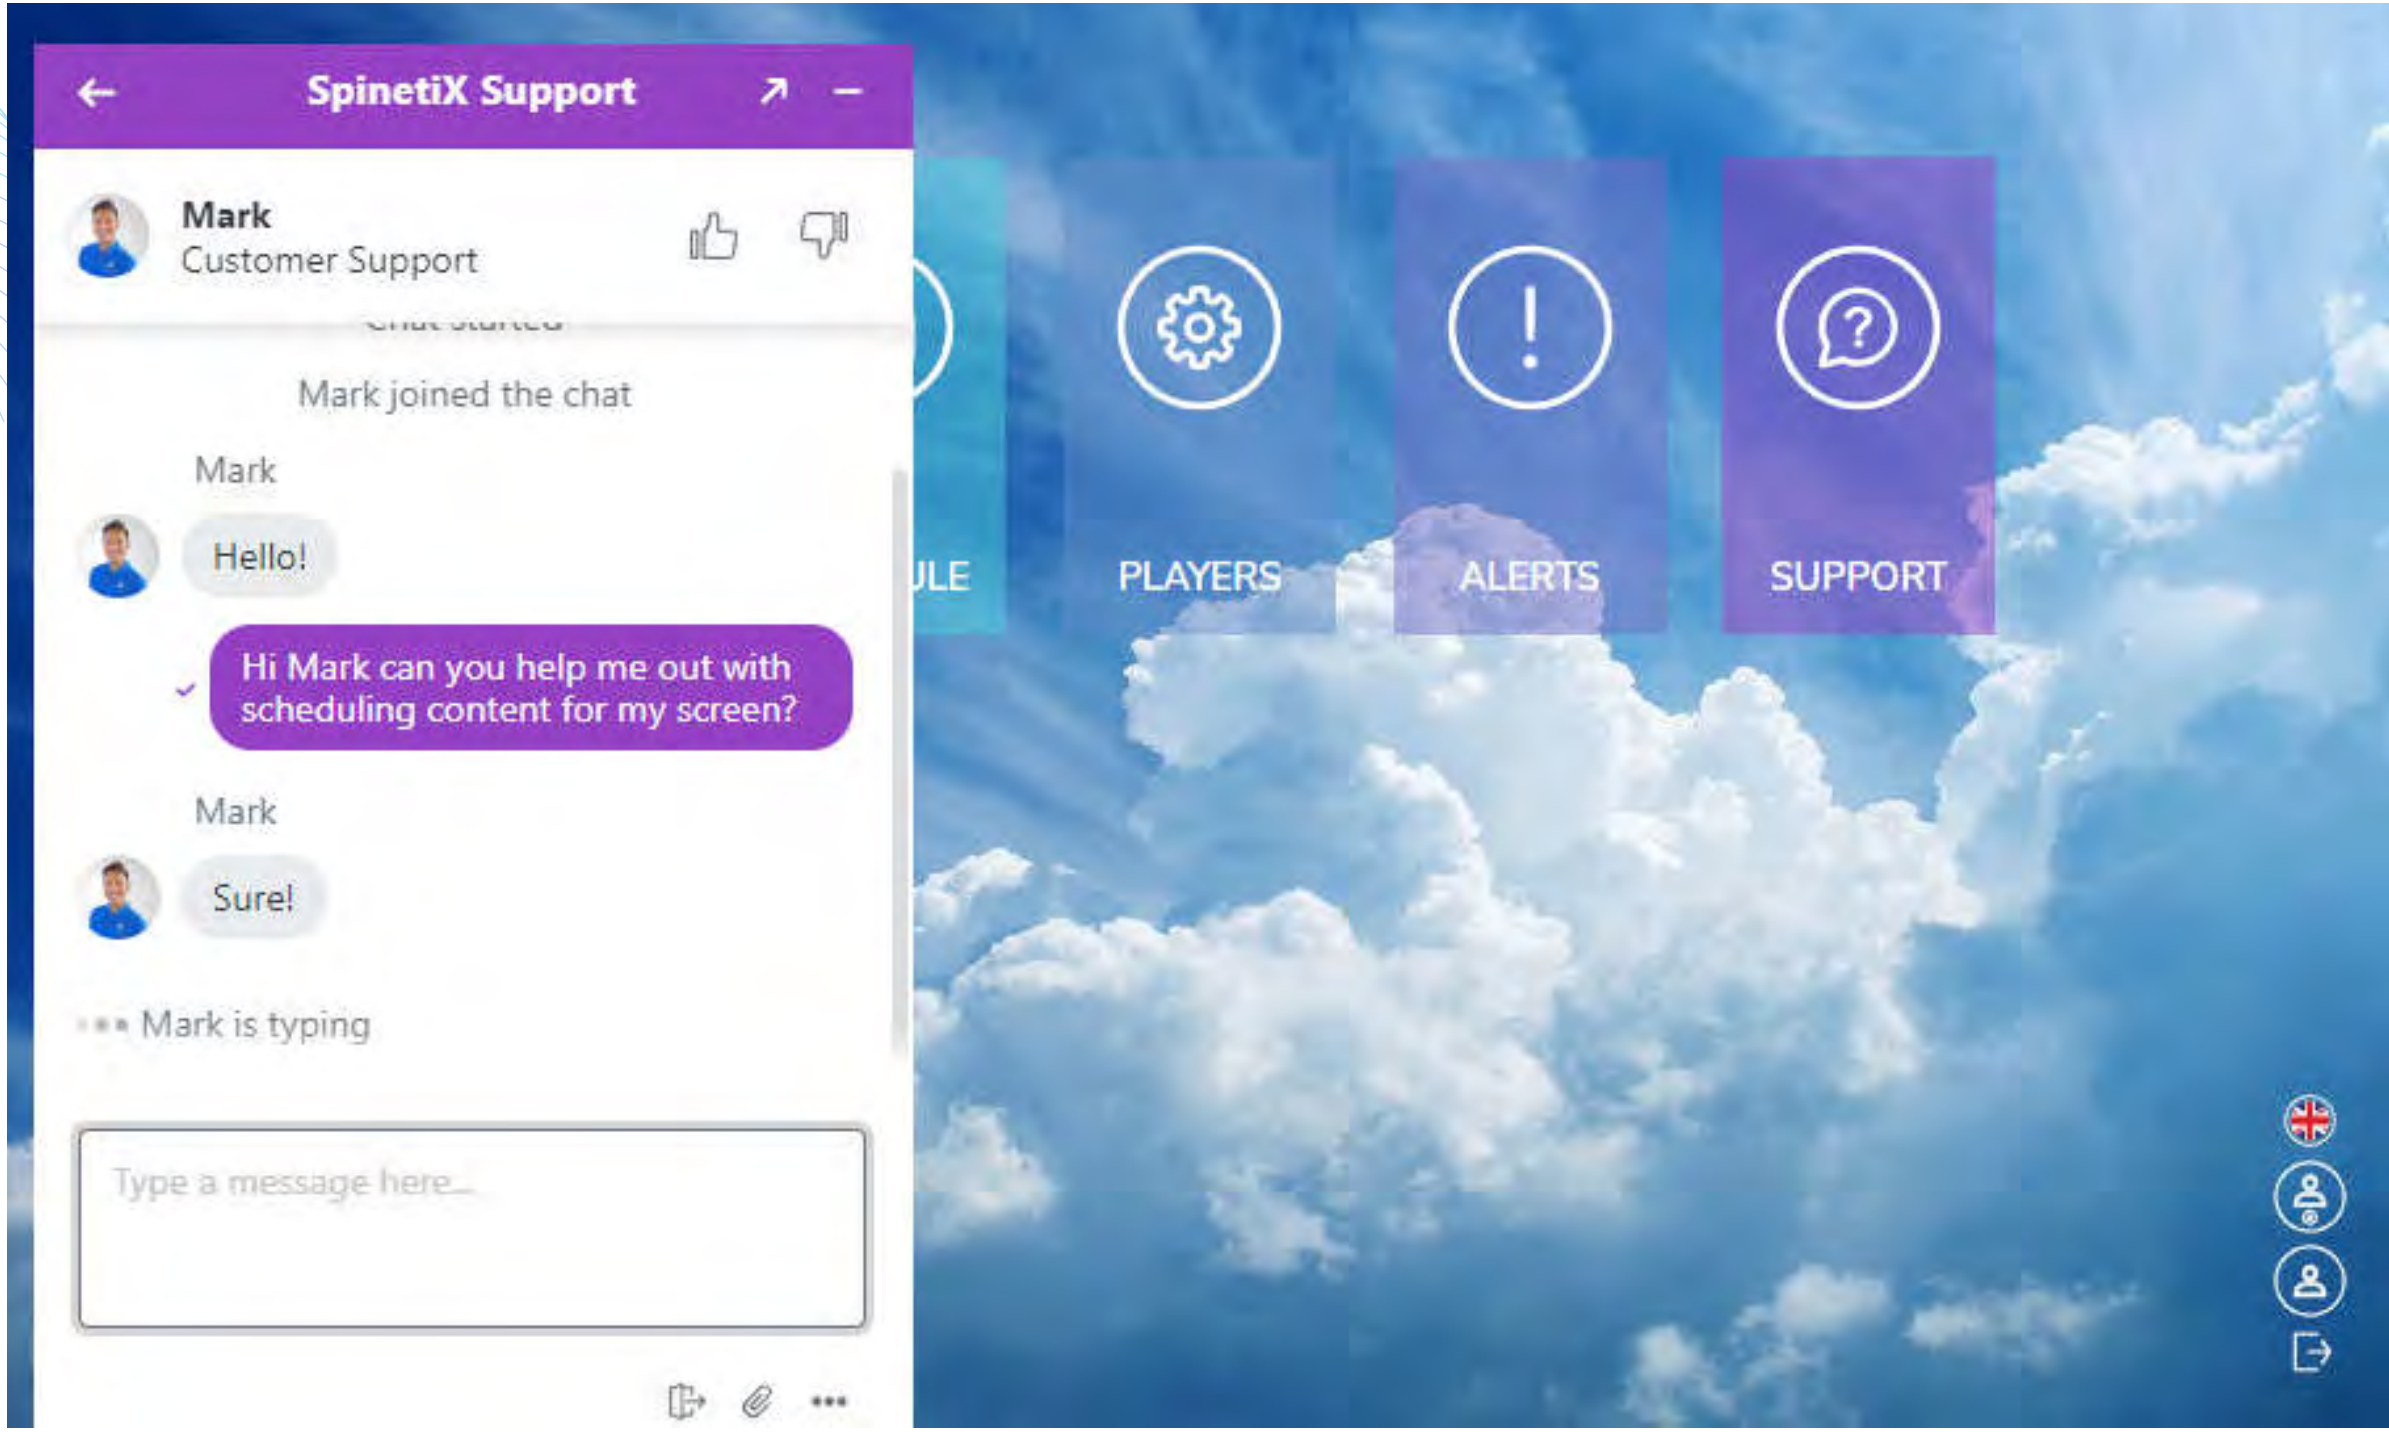

On the right, the 'PLAYERS' section shows 'MARKETING HMP400W'. The 'TAGS' section includes HMP400W, Reception, Zurich, Weather, and Cafeteria. A blue arrow points from the text 'Tag Grouping & Filtering' to the 'Weather' and 'Cafeteria' tags.

Sort Fast With Tags

Use tags to filter, organize and publish. The smartest way to manage your content.
