

SpinetiX partners with Littlebit Technology to offer its SpinetiX ARYA™ and DSOS™ on axxiv® computing devices

Hergiswil, Switzerland – February 20th, 2020 – SpinetiX partners with Littlebit Technology to offer SpinetiX ARYA™ cloud service and DSOS™ operating system on axxiv® computing devices. As a result, axxiv computing devices running SpinetiX ARYA and DSOS will be offered to Littlebit Technology customers in Europe.

A new business opportunity

The Littlebit Technology collaboration opens SpinetiX technology and expertise to even more business channels and customers. Commercial-grade axxiv computing devices, well known to IT integrators, are combined with the SpinetiX DSOS operating system and the SpinetiX ARYA cloud-based service. The bundle offers an all-in-one digital signage solution on trusted hardware, working out-of-the-box – ideal for business who want to get started with digital signage quickly. “We are delighted to partner with Littlebit Technology, an established and highly regarded name in the computing device space. Their expertise with this versatile platform and their experience serving IT customers, combined with our experience in digital signage will deliver all-round value to the IT channel in a unique package”, says Francesco Ziliani, CEO of SpinetiX.

Keep on the momentum about SpinetiX ARYA

Thanks to this collaboration, axxiv users will experience SpinetiX ARYA, the cloud-based visual communication solution designed for their business. Results are achieved on-screen in minutes, images, video, custom fonts and colors delivered securely through the cloud, with no limit to the number of displays. “Since its introduction 18 months ago, we have seen great success with SpinetiX ARYA. Now we want to build on that momentum by opening access to more users of Intel-based architectures. Littlebit Technology is a great partner to achieve this goal”, added Francesco Ziliani, CEO of SpinetiX.

Intel Technology Partnership and Special Purpose OS, SpinetiX DSOS

With this collaboration with Littlebit Technology, we also had the chance to expand our strategic technology partnership with Intel and its partners. As a proud member of the Intel IoT Solutions Alliance, SpinetiX is delighted to deliver its secure, purpose-built operating

system, DSOS to select Intel partners. DSOS by SpinetiX is a lightweight, secured operating system that brings appliance-level dependability to any qualified Intel hardware.

DSOS is maintained by a dedicated engineering team at SpinetiX, with more than a decade of experience in hardened, secure devices, and operating systems. The default DSOS configuration includes access to the SpinetiX ARYA cloud service, available to use by anyone, with a zero-cost option that includes first-line support. “We see the digital signage market growing and thanks to this collaboration with SpinetiX, we can better address frequent demands from our customers. The combination of DSOS and SpinetiX ARYA on our axxiv computing devices delivers a one-stop signage solution without today’s burden of OS configuration and support”, says Tim Deutschmann, Sales Manager Computing & Display Solutions at Littlebit Technology.

Relying on a strong technical and commercial experience from Littlebit Technology

As a Platinum Intel® Technology Provider, Littlebit Technology is recognized by Intel as a trusted partner focused in the supply, configuration, and support of computing and display solutions. Littlebit Technology has a strong track record of guiding customers to select the right device to meet their needs and providing Swiss high quality and excellent customer service. This common value, shared by both SpinetiX and Littlebit Technology, of providing customers with the highest support both commercially and technically is key to this strategic collaboration.
